

Polwarth Terrace

Edinburgh

System 17 curtain walling and complementary products are the perfect solution for Polwarth Terrace showcase apartments.

Metal Technology curtain walling, door and window systems have been installed on the Polwarth Terrace development of high quality homes in Edinburgh.

Designed to showcase the best in contemporary architecture, each apartment and penthouse features energy-efficient panoramic windows to maximise light. The development has been built for Wemyss Properties using the highest quality materials, meeting the latest building regulations and energy efficiency standards.

System 17 curtain walling offers the designer a wide and diverse range of profiles that provide structural integrity, weather performance and thermal enhancement. A cost-effective, quality engineered glazing solution, System 17 was an appropriate option for this expansive high rise glazed application. This was further enhanced when combined with system 25 four pane lift and slide patio doors.

All Metal Technology systems are technically innovative with aesthetic flexibility, freeing the designer to create appealing facades while delivering on sustainability, security and weather resistance. Complementing System 17, Metal Technology's System 25 lift and slide balcony doors and 5-20Hi+ doors, together with System 4-35Hi + windows complete the outstanding aesthetic solution. These products offer the latest in technical development, low maintenance and infinite recyclability for ultimate value and visual appeal.
